pilar

PILAR RM
first time

February, 2024
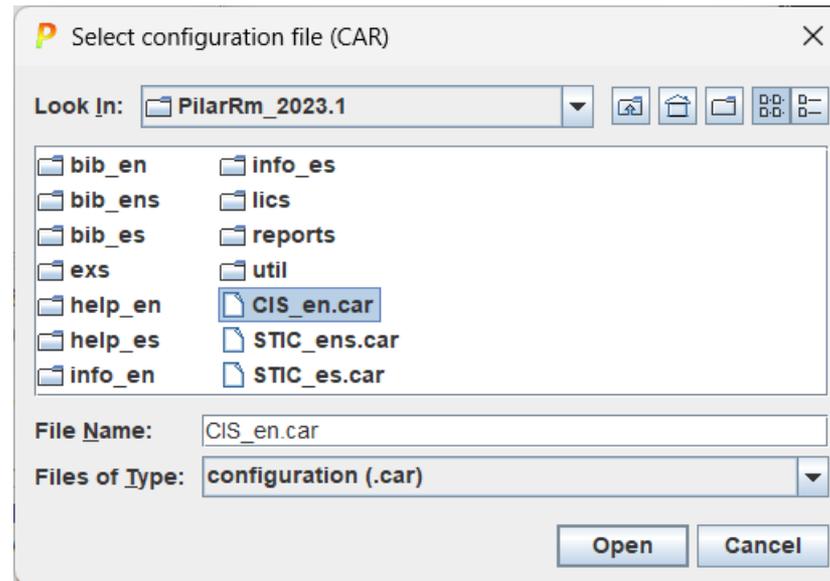

installation

- Prerequisites
  - java runtime 8 or newer
  - https://www.java.com
- Download
  - https://www.pilar-tools.com/en/tools/pilar_rm/download.html
  - windows: run installer
  - linux, mac: unzip installer
  - pilar is contained in a single directory: place it where it suits you
- Run
  - .exe | .jar | .app

first time

1. PILAR requests a CAR file
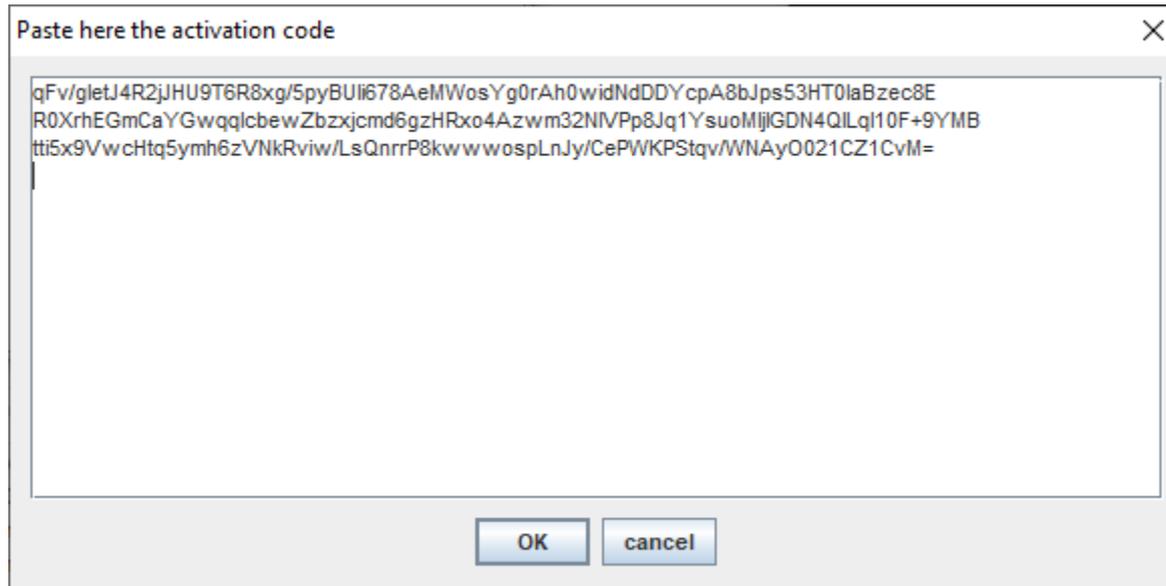

- Find it at installation directory:

2. PILAR asks for a license

- Select "activation code" if you received an activation string

- Select "license file" if you received a LIC file

- Select "evaluation license" if you wish to generate a 30-day evaluation license for yourself

first time

4

Paste here the activation code ✕
